

# INTRASOFT'S Single Window Solution

The Trader community one-stop-shop solution for Government services

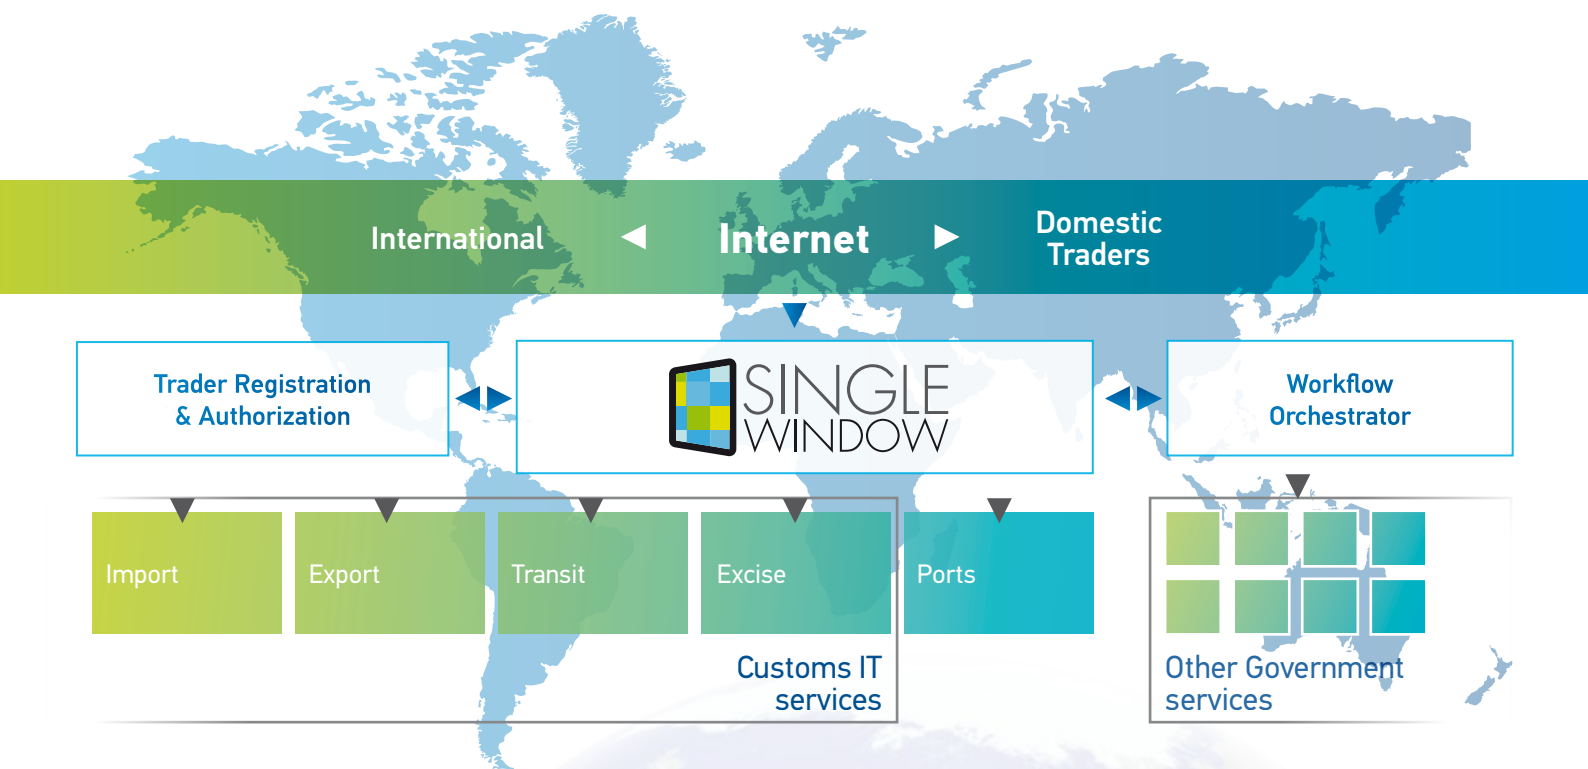

One common Single Window platform driving our Single Window product family:

- ⊙ Single point of communication for all Traders
- ⊙ Out-of-the-box compliance with international practices
- ⊙ Robust and well-tested interfaces
- ⊙ Secure communications
- ⊙ Flexibility in addressing your national demands
- ⊙ Friendly web-based access and B2G interface
- ⊙ Configurable business processes and flows
- ⊙ Staged and scalable implementation

**INTRASOFT's Single Window is based on the WCO data model v3.0...  
... enabling and simplifying cross-border transactions**

**Modularity**  
Based on the utilisation of reusable services, our modular approach results in:

**Extensibility**  
Designed to satisfy emerging international networking needs with optimal effort and cost

**Openness and Portability**  
The use of open standards and technologies minimizes technology dependencies

**Scalability**  
Easily expands to include new processes and agencies

**Reliability**  
Self-contained and well-tested modules allow faster implementation and reliable integration with other applications and existing systems

**Security**  
Security enablement guarantees authentication, access control, auditing and non-repudiation
